Facts from the American Academy of Orthopaedic Surgeons

**Low Back Pain: Causes And Cures**

Here's good news for the four out of five people who suffer from low back pain sometime during their lifetime: The best treatment is prevention—staying in good physical condition and avoiding injuries caused by heavy lifting. Here are important facts on the causes and cures of low back pain.

X-rays of the spine can reveal abnormalities that may result in low back pain.

Low back pain can result from:

- mechanical problems, such as poor posture, lack of regular exercise and obesity;
- injuries from lifting heavy objects, falling, and motor vehicle accidents;
- acquired conditions, such as incomplete formation of the bone in the lower spine and arthritis.

Many types of low back pain can be diagnosed and treated in the physician's office. Orthopaedists are specially trained to conduct diagnostic tests to find the cause of the problem. Once the physician has made a diagnosis, treatment may begin with bed rest. At times, a corset or back brace may be prescribed to support the spine.

Many people will begin a program of corrective and strengthening exercises prescribed by the physician. Various types of medication may be prescribed to relieve the pain, relax muscles and reduce inflammation. The vast majority of cases of low back pain will respond to nonsurgical care by an orthopaedist.

For a free brochure on low back pain, send a self-addressed stamped business-size envelope to "Low Back Pain," American Academy of Orthopaedic Surgeons, P.O. Box 618, Park Ridge, IL 60068.
