 In spite of the rain last Friday night the Woman's Club had a very good meeting, at the home of Mrs. Fishback. The Educational Department gave the following program:

Kentucky's Rank Educationally. Miss Clark Benefits of County Supervisors. Mrs. Cleo Brown How may a Community learn to know its unmet school needs? The Annual Farmers Institute will be held in the Court house in Mt. Vernon on Feb. 5 and 6 1913. A number of good speakers will be invited to address the farmers along the line of good farming. H. C. Black, advance agent of the Farmer's Institute, sent two or three days here this week arranging for the meeting and secured a pledge from a great number that they would attend and help in making the meeting a success. Such meetings ought to be very helpful to the farmers and when properly conducted and the proper interest on the part of the farmers it is bound to be a great benefit. Let us urge all farmers to attend this meeting with the hope that it will be worth something toward improving the farming conditions in Rockcastle.

At the annual election of officers of the Bank of Mt. Vernon last week, W. L. Richards was made active President, S. H. Martin, Vice-Pres.; A. B. Furnish, Cashier and Victor C. Tate, Assistant Cashier. An annual dividend of 7 per cent was declared and 4 per cent placed to the Surplus. For the reason that the business of the bank requires the service of three men, and the former President C. Williams being unable because of his large legal practice to devote any time to the bank, Mr. Richards accepted the Presidency and will devote his time to the bank just as he has in the past, the only difference, that in the future he will act in the capacity of President instead of cashier. The new cashier, Mr. A. B. Furnish is well known to every patron of the bank, having been with the institution every since it started two years ago. Victor C. Tate the assistant is an expert book-keeper and a splendid man for the place. Twelve years ago last October, Mr. Richards organized the bank and under his guidance as "Cashier it grew in strength and importance with each succeeding year and in his new capacity will no doubt be able to accomplish more in the future than in the past for the institution of which he was the chief instigator.

Why Clothcraft Insured Clothes Cost No More Than Take-a-Chance Clothes

CLOTHCRAFT Clothes would be high priced if the makers had to use ordinary clothes-making methods.

But the Clothcraft organization through its 66 years' experience in good clothes-making, has developed a system of scientific tailoring that, by simplifying operations and cutting out waste of effort and material, has greatly reduced the cost of making without sacrificing quality.

This improved science of clothes-making makes it possible to use expensive all-wool cloth and produce clothes that in style, fit and service would ordinarily lead you to believe were high priced. Yet Clothcraft Clothes cost you only \$10 to \$25.

On top of this, the results of Clothcraft Scientific Tailoring are so sure and efficient that the makers absolutely guarantee them to be disappointment-proof—which means that they are insured for all wool, good tailoring, lasting shape, satisfactory wear and service.

Clothcraft Clothes wouldn't be a bad investment even at usual good clothes prices.

At \$10 to \$25 you really can't afford to wait an other day before at least investigating them.

We are ready and waiting for you, and we'll be disappointed if we can't show you our fine line of Clothcraft Clothes for Fall and Winter.

We know you will appreciate them.

A Safe and Sane Investment—4130, The Clothcraft Blue Serge Special, \$18.50.

Danville Ky., Jan. 20—(Special)

A certain movement has been put on foot to secure an appropriation of \$400,000 from the United States Government to be utilized in modernizing the historic "Old Wilderness Road" which was blazed through the pioneer country in 1775 by Daniel Boone and his intrepid followers. The Danville Commercial Club, the Middleboro Commercial Club and the Mount Vernon club will join hands in the effort.

The original Wilderness road extended from the Tennessee border via Cumberland Gap, Middleboro, Mt. Vernon and Danville to Lexington, thence to Cincinnati and Frankfort and Louisville. Strictly speaking the old road was confined to the territory purchased by Richard Henderson, Daniel Boone and others composing the Transylvania company, from the Cherokee Indians and extended from the Cumberland to the Kentucky River.

Much of this land afterward was purchased by Isaac Shelby, the first Governor of Kentucky, and his old home, "Travelers Rest" seven miles south of Danville, was located on the "Old Wilderness Road" and was the common stopping place for those who traveled the historic thoroughfare. His reputation as a soldier combined with his far-famed hospitality, was largely responsible for Shelby's election to the governorship. Much of the original boundary of land owned by the first Governor is still held by his descendants.

AUTOMOBILE TRANSPORTATION.

The proposition is, to rebuild the "Old Wilderness Road" and modernize it to such a degree as to be prepared for all kinds of traffic. Much of the territory is without railroad facilities and automobile lines may be put into operation, thus giving the people an outlet that is needed. If the movement proves a success it will provide the connecting link between the North and South for automobilists. The automobile clubs of Cincinnati, Louisville and Lexington will be asked to co-operate with the commercial clubs.

Congressman Harvey Helm already has pledged his support and the aid of Senator James, Gov. James B. McCreary, Congressman Stanley and others is assured. The road if modernized will open a vast territory between Crab Orchard and Kentucky Gap that is almost isolated at the present time. The contention of the people back of the movement is that a high class road through this country will serve many times more people than would be benefited by the erection of locks and dams on rivers. The "Old Wilderness Road" is closely identified with the early history of Kentucky and will, if modernized, afford a direct line between Louisville and Knoxville and Cincinnati and Knoxville, through one of the most picturesque and historic regions of the country.
