

June Proclaimed Dairy Month

Official White House recognition of dairy foods as key foods in the American diet has been issued by President Truman in connection with June DAIRY MONTH. It has been announced here by the National Dairy Council headquarters for the annual national observance which begins June 1.

In a letter to C. R. Schoby, Iowa dairy farmer and Chairman of the National Sponsor Committee for June DAIRY MONTH President Truman said:

"Adequate food supplies are vital in building and maintaining the full production strength of all our people. The dairy industry has a major role to play in this effort. Dairy products are key foods, contributing greatly to the high dietary levels we have reached in this country. At this season, when milk production is reaching the highest volume for the year, it is appropriate to re-emphasize the industry's contribution to national health and welfare."

"Ample supplies of dairy products—and all other needed food commodities, the President continued, 'will keep us strong at home. They will also help make it possible for us to continue extending a helping hand to those friends abroad who join with us in building the defenses of the free world. June DAIRY MONTH is sponsored each year by 10 national dairy organizations. Chairmanship of the Sponsor Committee rotates annually. This year's chairman, C. R. Schoby, is president of the American Dairy Association."

Now in its 16th year, Dairy Month provokes celebration across the United States not only in dominant dairy farming areas, but others as well. Organized on a full 48-state and District of Columbia basis June Dairy Month is officially proclaimed by governors, mayors, and other civic and health figures.

It is conducted in thousands of communities to promote a better public understanding of the dairy industry and its products and to dramatize the many uses of dairy foods for health, economy, and good eating for all ages. In history of Dairy Month, colorful events are held as selections of Dairy Month Queens, milking contests, recipe contests and vast dairy parades.

The vital roles for good nutrition played by milk, cheese, butter, ice cream, and other dairy foods such as evaporated and dry milk are emphasized.

Additional federal governmental recognition given to June Dairy Month comes from U. S. Secretary of Agriculture Charles F. Brannan.

In a letter to Milton Hull, President of the National Dairy Council, Brannan said: "It is a pleasure to extend great thanks to the American dairy industry in observance of Dairy Month in June of 1952. 'Nutritious milk and dairy products are a symbol of the health and well-being of the American people in this critical period of world history. Dependable supplies of the vital foods are now more important than ever to strengthen and morale of our military defenders and civilian population.'"

That is why the observance of June Dairy Month by the dairy industry and the press and food trades performs a service both to dairy farmers and the consumers of dairy products," Brannan concludes.

June Dairy Month is sponsored by the American Butter Institute, the American Dairy Association, the International Association of Ice Cream Manufacturers, the Milk Industry, the National Cheese Institute, the National Creameries Association, the National Milk Producers Federation, and the National Dairy Council.

Potato Shortage

Commending the Supermarket and those hotel and restaurant associations which have urged their members to stop buying potatoes until they can assure the availability of potatoes at ceiling prices. O. P. S. Director Ellis Arnaoff declared.

"If potatoes are being offered to these buying organizations at overpricing prices, then it is overpricing to their credit that they are refusing to pay tribute to this kind of marketeering. These organizations are making a real contribution to stabilization and to the Nation's well being through the stand that they have announced."

"If all other buyers would follow suit, then any threatened breakdown in the normal distribution of potatoes will be avoided, to the great benefit of consumers and legitimate members of the trade."

Democrats Meet in Louisville

Louisville, Ky., May 19—Over 800 Democrats saluted Kentucky's "nominee" for the presidency last Saturday evening at Louisville's Seaboard Hotel, when Governor Lawrence W. Wetherby presented Vice President Alben W. Barkley with a summer-weight hat to throw into the ring now.

Undertold by the fifty-dollar dinner check, Democrats from every county in Kentucky came to Louisville for the Jefferson, Jackson Day Dinner. Official greetings were extended by Jefferson County Judge Roman L. Shamburger, United States Senators Earle C. Clements and Thomas R. Underwood and the gathering. Adjutant General Jess Lindsay presided as toastmaster.

Surrounded by Secret Service men and spotlighted by special lights for television and newspaper cameras, Vice President Barkley delivered one of the most dynamic addresses of his long career.

Speaking without notes he

Renomination of Court of Appeals

Chief Justice James W. Carmack of the Court of Appeals has been proposed for renomination on both Democratic and Fifth Appellate District—composed of eighteen counties.

The non-partisan Judiciary law permits judicial candidates to be proposed for office in this manner. Democrats proposing Judge Carmack for a new eight-year term on the bench were H. W. Alexander, Owen-ton; Leslie W. Morris, Frankfort; and Clinton M. Higginson, Lexington. The Republican proposal was signed by L. H. Humble, Midway, and Miss Ann Mary Martin, Frankfort.

Judge Carmack, native of Owen-ton, is a graduate of the Law School of the University of Kentucky; former school teacher and coach, head of the Division of Research of the State Department of Education, State NRA head from 1933 to 1935, and member of the Public Service Commission. He is the son of the late Alben W. Barkley, former Attorney General, U. S. Senator.

He became a member of the Court of Appeals in 1938 upon the death of the late William Rogers Clay and in 1939 was elected to complete the five years remaining of Judge Clay's unexpired term. In 1944 Judge Carmack was re-elected to the bench, being the nominee of both Democratic and Republican parties. He served as Chief Justice in 1944, again since January 1951.

The district includes Bourbon, Boyle, Carroll, Fayette, Franklin, Gallatin, Garrard, Henry, Jackson, Jessamine, Lincoln, Madison, Mercer, Owen, Rockcastle, Scott, Trimble, and Woodford counties.

Good Soil Tilth Helps Crops Thrive in Drouthy Weather

CROPS grown on soils of good tilth have a better chance of standing drouthy summer weather, reports the Middle West Soil Improvement Committee.

"The reason for this is that such soils soak up more moisture and store it for the use of crops during dry weather," says a statement issued by the committee.

Plant nutrients play an important two-way function, says the committee, in helping make more water available for crop use:

1—By producing larger amounts of organic matter, they help increase the soil's water-holding capacity. Less water runs off; more is saved for crop use.

2—"The nutrients help the plants make more efficient use of water. When ample plant nutrients are provided," says the committee, "the crop will actually make more growth per unit of water taken up. So crops grown on soils of good tilth are less likely to be affected by drouth when they are well nourished."

One of the best ways to add organic matter, according to the committee, is to follow a rotation that includes plowed under deep-rooted legumes such as alfalfa and sweet clover. These help loosen the soil and improve drainage.

You can fertilize the legumes and row crops following, with phosphate, potash and nitrogen as needed to produce bigger yields. In that way

Well structured soil (right) enables corn roots to forage for more water and nutrients. Tight, poorly drained soil (left) cuts down root growth.

You get more roots, tops, straw stalks and other aftermath to build organic matter in the soil. You can also increase the organic matter supply by saving and returning barn-yard manure to the soil.

NEW Taxi Phone Please call 35 for the new phone number for all TAXIS

roared his contempt for do-nothings who sought to destroy the Democratic structure that had improved the position of the law on citizens. In this connection he paid the highest tribute to U. S. Senators Clements and Underwood, declaring that "no state has been better served in Washington than Kentucky is now" and emphasizing the point by stating "it sits up there where I can see them."

While careful not to commit himself in any way, the Vice President said that a strong plea would find him ready and eager to make the race for President. He informed a delighted audience that he expected to "live for another fifty years at least."

Public Assistance News

"Some of Kentucky's public assistance recipients as well as the law on citizens are interpreting the newly enacted claim and lien section of the state's public assistance law," B. Barnes, commissioner of the Department of Economic Security, said in Frankfort today.

Barnes' department includes the division which handles old age assistance, aid to the needy blind, and aid to dependent children.

Barnes emphasized that contrary to apprehensions of some misinformed people, aged and blind recipients will not be afraid of the state depriving them of their property during their lifetime. Furthermore, he said, "the law also provides that burial expenses and the cost of the last illness of any recipient shall be paid before the state's claim."

"The state's claim and lien will be only for the amount of the Federal program," he said. Under the law, the recipient will retain ownership, possession and use of his property and does not sign over the property. The claim is not enforceable until after the death of the recipient, unless there was fraud on the part of the recipient in obtaining public assistance.

The surviving husband or wife, unless he or she remarries, and surviving dependent children are also protected by the law, which says that the lien shall not be enforced during their lifetime so long as they occupy the property," he explained.

The law as amended by the 1952 General Assembly was not intended as a hardship on old and needy people and in no way can cause a hardship. Nor does the law entail any sacrifice or self-deprivation on the part of the recipient, Barnes said. The provision, which goes into effect July 1, is intended to protect the Commonwealth's program of helping deserving needy people. The lien provision is an additional guard against fraud. It reemphasizes the responsibility of children to help care for their aged or blind parents to the extent of their ability, and further assure the taxpayer of the careful management of public funds," Barnes continued.

He reminded that Kentucky exercised a claim and lien pro-

vision during the first four years of the public assistance program—and in 1940 when it was taken out of the law by the state Legislature. He noted also that approximately 36 states have found the administrative safeguard provided by a lien clause advisable.

Barnes pointed out that instructions have gone out to all field personnel in the Division of Public Assistance designed to protect the recipients' interest. When a person requests that his assistance grant be withdrawn due to the claim and lien law field workers must hold a personal interview with the recipient before the grant is withdrawn. This will insure that the recipient clearly understands the provisions of the law, Barnes said, and that deserving needy people will not be depriving themselves of support.

Recipients or prospective recipients who may be in doubt on any point of the law are urged to inquire at the nearest county office of the Division of Public Assistance or write to the divisions central office in Frankfort.

To Help Small Businesses

Uncle Sam is making a big business out of helping small businesses. This is a development which the Kentucky Chamber of Commerce pointed out today in a plea that "our Government in Washington give same real help to the nations small businesses by reducing the taxes on the small business man, and getting rid of bureaucratic red tape and restrictions."

If Congress should vote the full amount requested next year for the "small business" activities of the various Federal agencies and of Congress it

self, the Kentucky Chamber figured the total bill to run there would be about \$8,000,000 annually. Most of this money would go for salaries of more than 1,500 persons on various Federal "small business" agency payrolls.

Representative J. Vaughn Gary (D., Va.) of the House Appropriations Committee added the number of actual employees on small business activities in 11 Federal agencies and found that these alone totaled 757 persons. On top of all this, an appropriation of \$3,100,000 is now asked to support the newly created Small Defense Plants Administration which would have a payroll of some 600 employees next year.

Still others are similarly employed in connection with the Federal Government's foreign economic aid programs. The activities of the Senate and House Committees on Small Business cost more than \$150,000 a year.

The KCC said Congressional Committee hearings and reports show mounting evidence of duplication, competition and conflict among these small business agencies of the Government.

The Chamber charged that the Federal Government's apparent concern for small business is often motivated by the demagoguery of politicians who orate loudly in behalf of the small business man and at the same time vote for oppressive legislation which regulates and restricts him, taxes away his earnings and even puts the Government into business which compete unfairly with him.

A total of 58,500 forest tree seedlings have been distributed in Leslie county this spring. Buford Excher, Jr., of Powell county plans to build a trench silo for untopped grass.

JUNE DAIRY MONTH

Proclamation By The Governor Of The Commonwealth of Kentucky To All To Whom These Presents Shall Come:

WHEREAS, the health and economic welfare of the citizens of the Commonwealth of Kentucky is of utmost importance; and

WHEREAS, the use of milk, nature's most perfect food, and other dairy products in the diet does tend to insure the health and growth of our youth; and

WHEREAS, the climatic conditions and natural soil resources of Kentucky make it possible to produce the abundant pastures and meadows necessary to the economic production of dairy products; and

WHEREAS, the dairy cattle annually achieve their maximum production coincident with nature's most bountiful season of the year; NOW THEREFORE, I, Lawrence W. Wetherby, Governor of the Commonwealth of Kentucky, do hereby proclaim the Month of June, 1952, as

JUNE DAIRY MONTH IN KENTUCKY

and urge that each person as well as civic business associations cooperate in its observance by showing appreciation and increased interest in milk and dairy products which are so vital to the well-being of all.

Done at Frankfort, Kentucky, this the twenty-second day of April in the year of our Lord one thousand nine hundred and fifty-two and in the year of the Commonwealth the one hundred sixtieth.

Lawrence W. Wetherby Governor

RED HILL

There was a large crowd attending the Memorial services and home coming at Red Hill, Sunday.

Brother Earl Roberson and family that sing over station WVKL were at Red Hill Sunday and made music and sang that was enjoyed by all. Earl was born and reared here. We always welcome him back at any time.

Week-end guests of Mr. and Mrs. Bert Mullins were Mr. and Mrs. Wilmer Mullins and family from Hamilton O., and Mr. and Mrs. Ted Mullins from Kokomo, Ind.

Mrs. William Ham

monds has returned home from the Berea hospital. She is getting along fine.

Mr. and Mrs. Smith Kelly from Hamilton O., were week-end guests of Mr. and Mrs. Harrison Ponder.

There were several good preachers that attended the Memorial service at Red Hill. We enjoyed all of them.

The daily vacation Bible School will start at Union Baptist Church, Monday June 9th. Everyone is invited to attend.

Rev. A. H. Keith will be in charge.

Mr. and Mrs. Charlie Thomas spent Saturday night and Sunday with Mr. and Mrs. Jepp French.

Week-end guests of Mr. and

Mrs. Ollie Mullins were Mr. and Mrs. Clyde Elliott and children and Bobby Mullins from Richmond, Indiana; Dewey and Evelyn Mullins and Mrs. Eliza Rose, of Knoxville, Tenn.; Mr. and Mrs. Harry Morris and children; and Donald Mullins of Louisville; Also Mr. and Mrs. Russell Daugherty of Richmond, Ind., and Mr. and Mrs. Lewis Mullins and children of Climax, Ky., and Mrs. Lucy Ferguson of Mt. Vernon.

We are glad to report Mr. Sheridan Jones will be out again after a serious illness. Mr. Richard Singleton is slowly improving after returning home from the hospital.

THE TRUE CHURCH

By a witness of Jehovah

Rose Jasper

Approximately 1900 years ago Jehovah began to build the church. He first laid the foundation stone which is Jesus Christ. (Mt. 16:18) (1 Cor. 3:11)

Then came the apostles of Jesus Christ and upon these other lively stones that go to make up this spiritual house to offer spiritual sacrifices acceptable to God by Jesus Christ. (1 Pet. 2:5) (Eph. 2:20-22)

This building is not made by hands but is the true tabernacle of the Lord pitched and not man. (2 Cor. 5:1) (Heb. 8:2)

The Lord dwelleth in temples made with hands. (Acts 7:48) For you are the temple of the Living God as God has said, "I will dwell in them and walk in them and I will be their God." (2 Cor. 6:16)

Neither shall they say, Lo here, no lo there for the Kingdom of God is within you. (Lk. 17:21) If so be that the Spirit of God dwells in you. (Rom. 8:14)

The church or Kingdom of God, has for a long-time been a mystery but is revealed for

those who seek God with the whole heart. (Mark 4:11)

This small flock of lively stones will ultimately resign with Christ and bless all nations of the earth as it is written at (Rev. 2:26-27) (Mat. 19:28)

Rev. 14:3-4 tells the number to be taken from the earth, 144,000 who are able to drink the cup of suffering for the Kingdom of God sake. (Mark 10:39) This earth was not created in vain. God says he made it to be inhabited. (Isa. 45:18)

Although not always for wicked creatures yet he gives all men fair and equal opportunity to seek and know him for says Peter, "According to God's promise we are looking for a new heaven and a new earth, wherein dwells righteousness." (2 Pet. 3:18)

So we find most of the sheep will live on a beautiful cleansed earth and only those who are able to drink the cup Christ drank can ever hope to be saved. (Mt. 26:28) (Mat. 20:28)

The dead shall be raised like Jesus raised Lazarus. Not all will be raised to the spiritual life like Christ but just those who are able to drink the cup, the others will be raised like Lazarus. (St. Jn. 5:28) (Acts 24:15)

Because Jehovah has appointed a day in which he will judge the world in righteousness by that man Christ Jesus in that he has given assurance unto all men in that he has raised Christ from the dead. (Acts 17:31)

UNIFORM TRUCK RATES

AIM OF STUDY BY STATE

Commissioner of Motor Transportation John M. Kinnaird today announced a thorough study will be given to a system of uniform intrastate rates for the motor industry in Kentucky.

June 3 was set as a deadline designed to bring about a greater degree of uniformity within the industry.

The Division of Rates and Services headed by Delmar Lyon will study the suggestions, Kinnaird said.

"Kentucky's motor freight rates grew in a chaotic way and today are a hodge-podge," he added. "Equitable changes need to be made in justice to shipper and carrier alike. It will be

our firm endeavor to make them."

ABC BOARD DISCLOSES

4-YEAR ACTIVITY GAIN

Chairman Guy C. Shearer of the Alcoholic Beverage Control Board today reported that there have been convictions of 144 licensees on charges of permitting gambling on licensed whiskey and beer premises during the last four-year period, compared with two such convictions for the preceding four-year term.

Shearer disclosed a heavy increase in the volume of business before the ABC Board, which regulates the liquor and beer traffic in Kentucky, with 860 cases being tried during the period, compared with 549 for the preceding term.

In addition, he points out that 605 convictions have resulted in the last four years, compared with 293 in the comparable period, while still seizures also increased tremendously during the period. There were 346 stills seized and destroyed from April 1948 to April 1952, compared with 97 during the preceding term.

The ABC Board also cited figures to show that of the 682 cases disposed of during the last four years, 159 were for having disorderly premises; 109 for selling to minors and drunks, 88 for Sunday sales, 81 for selling without proper licenses, 29 for keeping improper records, and 11 for permitting minors to loaf in bars.

Four necessary steps in having frozen foods so the family will enjoy them were set out by Mrs. Pearl Haak, consumer authority at the University of Kentucky. They include: selection of varieties that freeze well; harvesting them when young and tender, careful blanching and cooling, and not overcooking them at the time of serving.

4 STEPS NEEDED

IN FREEZING FOODS

Vegetables that are frozen when young and tender will have a bright green color. Snap beans become tough and starchy as they mature, lima beans turn white and peas get sticky.

A warning to housewives

that all vegetables must be blanched in order to avoid change in color, flavor, texture and food value was given by Mrs. Haak. Blanching consists of submerging the vegetable in boiling water for a period of time from 15 seconds to eight minutes, then in ice water for the same period. Avoid slow heating and slow cooling, as they make for an inferior product, the specialist said.

Satisfactory containers for freezing are of glass, tin or plastic, or cartons lined with cellophane or plastic.

Mrs. Haak reminds housewives that frozen vegetables require less cooking than fresh ones, when they are prepared for the table, as they are prepared in blanching before freezing.

The revived curricular, No. 3-98, "Storing Foods in Freezer Lockers," gives directions for preparing and freezing vegetables, fruits, meats and poultry. A copy may be had from the Extension Service, Lexington, or from the Experiment Station, Lexington.

MIDWEST TRAVEL EDITORS

ON TOUR OF KENTUCKY

Travel editors from newspapers throughout the midwest are visiting Kentucky this week to see what the Commonwealth has to offer as a tourist state. The tour for them is being sponsored by the Kentucky Chamber of Commerce with the cooperation of the State Division of Publicity. Representatives of 30 out of state newspapers received invitations.

Governor Wetherby will travel with the group during most of the tour.

High spot of the trip will be the Mountain Laurel Festival at Pine Mountain State Park near Pineville, Memorial Day. The tour which started in Louisville Sunday, will end at Frankfort next Sunday morning with a breakfast at the Governor's Mansion.

Other places on the tour schedule include Kentucky Dam Village and Kentucky Lake State Park; Jefferson Davis Monument, at Fairview; Bowling Green; Mammoth Cave; Lincoln Memorial, near Hodgenville; My Old Kentucky Home, near Bardonia; Lebanon on Pioneer Memorial State Park at Harrodsburg; Danville; Wolf Creek Dams and Lake Cumberland; Cumberland Falls; Corbin Natural Bridge State Park; near Slade; Lexington; and the horse farms in the Bluegrass area.

THE GARDEN

TOMATO LATE BLIGHT

By John S. Gardner

Tomato late blight may seem like an old story, but nobody knows when it may come again. Should it not come this year, the other tomato troubles, leaf mold, early blight, leafspot, and anthracnose, will. Although the other tomato troubles more slowly than the bad blight, their destruction is as complete. So it's a good idea to have a late patch coming on, to take up when the fruits on the first set-plants become so small and sour as not to be useable. That second patch will not be needed if protection has been given the first with materials that control the early diseases, while insuring against the late blight as well.

Such materials are oxychloride and basic copper sulphate copper certain of the carbamates.

The oxychloride commonly found is Cupro-K and others, carrying about 45 percent metallic copper (read the label) and used at the rate of 2 level tablespoons per gallon of water. Also, there is Tennessee 26, but 3 tablespoons are needed per gallon. Basic copper sulphate (52 percent copper) sells under its own name, and 2 tablespoons are required per gallon, with 3 or 4 tablespoons of wheat flour to keep it from settling, or use any of the 'soapless' soap powders, as the manufacturer suggests in the fine print on the label.

The most effective carbamates are Dithane and Parzate, both about 60 percent, one and one-half tablespoons to the gallon of water.

A many tomato diseases start early, spraying should start when the fruits of the 1st cluster are the size of a pea, and should be repeated every 10 days, making from 8 to 10 sprayings by the last week of the season.

For the first time, Franklin county tobacco growers used DDT with blustone and lime on plant beds.

NEWS FROM THE WASS ... This comes from photos aboard the U.S.S. Wabigoon, ship's crew last week, at Norfolk, Va., as Rear Admiral E. H. Tupper addressed his crew on the ship's return from a five-month tour of duty in the 7th Fleet. The ship supported U.N. action in Korea with her guns and received a direct hit.

True to Tradition... Consider the honor and integrity of him who makes the goods before you buy. That was the counsel a wise man of ancient Babel gave to a young man who wanted to know how to get his "money's worth." It's still good advice today... when we say "look for the John Deere trademark." For more than 110 years farmers have sought out the John Deere name as their assurance of quality when buying farm equipment. They know that the familiar leaping deer has always labeled only farm equipment designed and constructed to give them the maximum service at the lowest possible cost. Today, more John Deere equipment is being sold than ever before. John Deere regards this farmer confidence as a sacred trust that is guarded zealously in maintaining John Deere service and quality "true to tradition."

Rev. and Mrs. Harold Pitcher of Covington and Mr. and Mrs. Mitchell Ballinger of Winchester were here Friday to attend Memorial services at the Johnetta Cemetery.

Week-end guests of Mrs. George Mullins included: Mr. and Mrs. Roy Mullins and family of Dayton, Ohio, Mrs. John Marsh and Mr. and Mrs. Warren Heel and children of Hamilton, Ohio, and Mr. and Mrs. Howard Gibb and daughter of Dayton, Ky.

Mrs. Gertrude Atkinson and daughter spent last week with her sister, Mrs. Lewis Mullins. Mr. and Mrs. Tom Cummings of Dayton, Ohio were here Friday.

Mr. and Mrs. A. R. Parsons were the week-end guests of her parents, Mr. and Mrs. Nathan Mullins.

Mr. and Mrs. Carl Brown and

son, Randall of Mt. Vernon visited Mr. and Mrs. James Mullins, Friday. Mr. and Mrs. B. J. Anderson and daughter of Berea visited her parents, Mr. and Mrs. Nathan Mullins Friday night.

Pfc. Fred Mullins, Jr. left Tuesday morning to report for overseas duty. Roy Jarvis, Virgil, Junior and Cecil Mullins went fishing Saturday night at Wolf Creek Dam.

Mr. and Mrs. Frank Calahan and Mr. and Mrs. Mark Sady were in Sand Gap Sunday.

Mr. and Mrs. Russell Mullins of Richmond, Ind., visited his parents, Mr. and Mrs. Rubian Mullins last week.

Mr. and Mrs. Everett Jennings and Mr. Theop Clark of Hamilton, O. were guests of Mr. and Mrs. Arthur Clark over the

holiday. Miss Elizabeth Anglin of Louisville, spent the week-end with her parents, Mr. and Mrs. Henry Anglin.

GUIDANCE

We have a service to suit the purse of the humble, as well as the rich - All distinction of class and wealth are forgotten. Every service is conducted with the same quiet sympathetic understanding and capable attention to the smallest detail.

Community Holds Reunion Sunday

Mr. and Mrs. John Spoonmore, Rev. and Mrs. Cersel Blanton and Lloyd Brock of the Negro Creek Community Celebration last Sunday.

For the past thirty-five years well as huge bouquets of hands the Negro Creek Community, located about 2 and one half miles west of Brodhead, has held celebrations at the local cemetery in honor of the dead. The cemetery belongs to the Pentecostal Holiness church. About 35 years ago a man by the name of Mac Hutchins, a Baptist minister of that community started the first gathering in honor of the departed. Every year, since then, on the first Sunday in June, the entire community gathers there to listen to some gospel singing or to hear a preacher preach and to decorate the grave of a loved one.

On Sunday morning there was a large crowd there. The narrow country road was dusty. Cars were parked on both sides of the road. Traveling through this narrow space was slow and difficult. People brought their dinner baskets as church there.

Human-like Fossil tracks on Finnerl Farm in Rockcastle County World-wide Interest

The human-like tracks in sandstone, 250 million years old, that were discovered several miles south of Berea on the farm of Mr. O. Finnerl, have aroused widespread interest throughout the United States and Canada. The news even crossed the Atlantic and the English and European newspapers are about to publish the account.

The reason for the continued public interest in the tracks is due to the fact that man's life on earth has been reckoned only one to two million years, and these human-like tracks of Southeastern Kentucky were made 250 million years ago during the time known as the Age of Amphibians. According to geological text books, land animals of those years moved about on four legs. The Kentucky tracks, however, are definitely not the tracks of amphibians. They were made by creatures that walked on their two hind legs and had feet strikingly like human-beings who had never moved about Similra footprints in strata of the same age as those on the Finnerl farm occur in a few other localities in the State of Kentucky. Some of the so-called Indian tracks in solid rock may really be the footprints of these ancient creatures. On the left and right footprints of one of the mysterious creatures is shown in the accompanying illustration just as they were photographed in the solid rock on the O. Finnerl farm by Mr. Fortner of the Ogg Studios.

The kind of creatures that made the tracks has not been determined. Were they really men and the ancestors of present day men, or were they some animal that at least partially resembled man?

Since Dr. W. G. Burroughs, professor of geology, Berea College, and William Finnerl of Berea reported the tracks, they have been endeavoring to solve the problem. They have had the co-operation of the vertebrate paleontologist, Prof. C. W. Gilmore, of the Smithsonian Institution, Washington, D. C., and other noted scientists. Prof. Gilmore notified Prof. Burroughs that a track had been found in Pennsylvania and another in Missouri somewhat similar to the Kentucky tracks during the preceding (19th) century. These tracks were found in rock of the same period as the Kentucky tracks. The Pennsylvania track, however, Prof. Burroughs states is very primitive and evidently related to a highly developed creature as the Kentucky tracks. The Missouri track does look very similar to a human track, but it is not clear from particulars from the tracks on the Finnerl Farm. If the creatures that made these tracks were related in any way, the evidence shows that they roamed over a wide area of the Central portion of the United States.

The Kentucky Tracks
The geologic age, Dr. Burroughs states, in which the creatures lived in any made the tracks on the Finnerl Farms is known as Potville time, of the Upper Carboniferous system. The footprints are sunken into the sandstone because of loose, damp sand (later consolidated into sandstone) sank beneath the creatures' weight as they moved about. Each footprint has five toes and a distinct arch. The forward part of the foot is broader than in the modern human foot of a civilized person who has worn

Sand Springs Gets New Church Bell

A new field of usefulness will soon open for three 350-lb. brass bells, removed from as many scrapped locomotives of the Louisville and Nashville Railroad, June recently crated and shipped, the bells will henceforth call to worship the congregations of the following churches:

- Grapevine Baptist Church, Lamont, Ky.
- Church of God, General Assembly, Middleboro, Ky.
- Sand Springs Baptist Church, Sand Springs, Ky.

The Louisville and Nashville Railroad has donated a total of 163 of these bells to churches along its line, chiefly located in rural areas. They were first put into practice in July 1950. Some 40 other applications have been approved for churches and bells will be shipped as soon as sufficient locomotives have been scrapped.

The foot curves back to a very human appearing heel. The tracks are strikingly like the foot of the aborigines of southeastern Asia, remarked a man who has spent many years in the Orient, on viewing the tracks. The sand grains within the heel together as in the heel of the same track, though closer together in the area of the heel of the track. This is because there was more pressure upon the heel than beneath the arch of the foot. The tracks are identical to many of the tracks is uprolled due to the damp, loose sand having been pushed back and forth as the foot sank into the sand. One track shows this uproll especially where the foot pushed outward in turning. The forward part of one track, discovered by Mrs. Mavis R. Burroughs, is covered by solid Potville sandstone a few days or weeks younger than the sandstone in which is the track. The sand grains of the track are identical with the grains of the Potville sandstone in which is the track.

Another track nearby is also partially covered by solid Potville sandstone. In some of the tracks entirely exposed to view there are tiny pits in the rock. These are either caused by weathering out of tiny pebbles, or by small pebbles sticking to the wet foot of the creature as it walked in the sand. A pair of tracks is shown in the illustration. Another pair of tracks shows the same advanced relative to the right foot. The distance from the heel of the right foot to that of the left foot is 12 inches. This indicates somewhat the length of legs and height of the creature that made the tracks.

The tracks, Dr. Burroughs states, have been preserved for million, because after they were made by the creatures walking in damp loose sand, no rain fell for some time and the footprints became solidified in the sand. Within a few days or weeks the region, which was evidently a boggy area, sank beneath the water level and sand, similar to that in which are the tracks was deposited upon the tracks. The sand grains of the rock just outside the track, due to the pressure of the creature's feet, were packed together. The arch of one of the best preserved tracks are not as close to the tracks. The sands consisting of sand and shale were deposited until several hundred feet of strata covered the tracks. At the close of the Upper Carboniferous Period, Eastern Kentucky emerged from the water and has since remained dry. The tracks, however, were quite recently, geologically, the tracks were revealed at the surface.

The importance of these fossil tracks on the history of man is hard to consider, but what we do feel that one machine is quite sufficient for both places.

Heart Attack Fatal To Mrs. Lula Thomas

Mrs. Lula Thomas of Snyder died Thursday after suffering a heart attack Wednesday night when high water of Roubidoux Creek rose about three feet in her home.

Mrs. Thomas is the wife of Park Thomas. She is a native of Rockcastle county. Mrs. Thomas is the daughter of Sam and Ellen Lambert.

She is survived by her husband, Mr. Park Thomas of Snyder. Eleven children as follows: Otis Thomas of Franklin, O. Amos, Ussell and Ian all of Dayton, O. Ray Thomas, U. S. Army, Will, U. S. Army in Germany, Anna, Ellen, Goldie, Alene and Betty all of Bobo, Two brothers: Jack Lambert of Brodhead, Dayton, O. Two sisters, Mrs. Dewey Webb of Dayton, O. and Mrs. Henry Huff of Conway, Ky. She has four grandchildren.

Mrs. Thomas is a member of Fair View Baptist Church. She was a willing worker for the church she loved.

Funeral services were conducted by Rev. Ira J. Dean of Berea, at the Fair View Church Burial was in Fair View Cemetery. Roneyer Funeral Home was in charge of arrangements. Much sympathy is extended the family.

CARD OF THANKS

We wish to express our thanks and appreciation to the business men of Mt. Vernon, Ky., for their donations to the 1952 Seventh Day Adventist Ingathering Campaign.

Elder Z. B. Currie and members of the Grove S. D. A. Church.

Four Future Farmers Attend Convention

Four members of the Mt. Vernon Chapter of Future Farmers program will be presentation of the state officer candidates at an interview program conducted by Bailey Arrington, WHAS farm program director.

The Mt. Vernon FFA chapter had a total membership of 27 girls during the past year. Mrs. Audrey Smith is advisor to the local chapter. Membership in the organization is limited to girls who are taking, or have taken Home Economics in high school. The State Advisor of the organization which is now composed of 206 chapters with 12,000 members, is Miss Mary Bell Vaughn of the Division of Home Economics Education, Frankfort.

Rev. W. E. Haggard

Rev. W. E. Haggard formally of Brodhead is conducting a revival at the Nazarene Church at Sevierville, Tenn. The revival begins Wednesday night June 11, at 7:30 P. M. and continues through June 22.

The public is cordially invited to attend these services.

New Mower Needed For Cemetery

Ernest Burton of Willalla, Ky., and Robert Gentry of Levell Green, Ky., will be glad to receive your donations to help buy a power lawn mower to be used at the Friendship cemetery at Sevierville and at the Lawrence Cemetery near Willalla.

Hugh Robbins Injured In Automobile Wreck

Hugh Robbins, driver of Daugherty taxi, was badly injured when his car colliding with a large trailer truck on U. S. 25 near Burr last week Thursday at about 10 o'clock at night. Mr. Robbins claims that the trailer truck was too far on his side of the highway. Mr. Robbins was taken to the Berea College Hospital, but was returned home Sunday where he is recuperating nicely. He received injuries on his chest, leg and neck. The taxi was badly damaged.

Renfro Valley Horse Show Held Friday

The Renfro Valley Horse Show was held at the Renfro Valley stadium last week Friday afternoon and evening under the management of Mr. Hugh Hunter. A good number was present for the first time. A much larger number of persons visited the show during the evening's performance. At the close of the afternoon were as follows:

- In the Equitation class first prize to No. 12, Trish Lady, ridden by Mary Cammack of Mt. Sterling.
- In the Harness Pony class first prize to No. 30, Mrs. Little Buddy ridden by Jeanette Smith of Corbin, Ky.
- In the Equitation class for girls under 12 years of age the first prize went to No. 14 horse Marjorie Genius ridden by Leah Nell Boston of Versailles, Ky.
- In the Junior Walking class the first prize went to No. 13 horse Fern, ridden by William Smith and owned by Mrs. No. 14 horse Marjorie Genius ridden by H. A. Stages of Versailles, Ky.

Womens Club Meets With Mrs. Griffin

The Mt. Vernon Womens Club met at the home of Mrs. John W. Griffin on Tuesday evening, May 27. Co-hostesses were Mrs. Preston Nunnelly, Mrs. Audrey Smith and Mrs. Burgess Robbins.

Mrs. Fred Lucas, London, Ky., District Governor of Kentucky Federation of Womens Clubs was the guest speaker. An very interesting account of the General Federation Convention at Minneapolis, Minn., was given by Mrs. Chloe Gifford, Lexington, Ky., who was elected Third Vice-President of the General Federation. The discussion was on "The Power of the Womens Club."

FERTILIZER MAKES FESCUE PROFITABLE

Results of the proper use of fertilizer and good management can be seen on the farm of W. M. Powell in Clark County. On a field of 2.7 acres of fescue harvested approximately 100 pounds of certified seed in 1951 for 65 cents a pound. In addition, he baled 1330 worth of fescue straw and 1330 worth of head of sheep for 2 months in the winter. Charles D. Shouse, farm agent with the University of Kentucky, notes that Mr. Powell applies about 40 pounds of nitrogen per acre every year, after having applied the needed phosphorus, lime and potash at the time of seeding three years ago.

Garrard county homemakers diversified approximately 100 magazines to small schools with out libraries, the county hospital and the county jail.

TO FARMERS

If you need ammonium nitrate, I just received 150 bags today. D. B. Saylor, Fertilizer Dealer, Mt. Vernon, Ky. 3512

The wreck of two heavily loaded trucks on Sigmom Hill. The accident happened on Monday morning. The truck loaded with the timber was badly damaged. It was driven by Oscar Bowling of Bernstead. The other truck loaded with tile was driven by Jesse Jennings of Clearville, Ky.

Future Homemakers Attend Meeting

Homemakers are attending the organizations 7th annual State meeting this week in Richmond. The meeting will be held on the campus of Eastern Kentucky State College with the chapters of the Richmond District serving as hostess chapters to the group.

Attending the convention as representatives of the Mt. Vernon Chapter are: Melba Norton, President of our local chapter, Bonnie Purcell, Sylvia Bullock, and Kathleen Chidess. Sylvia and Bonnie will serve as waitresses to the group at a banquet to be held Wednesday afternoon, but not far enough to hurt the driver. He escaped injury by a hair's breadth. He received a small scratch on his arm.

The other truck was driven by Jesse Jennings of Clearville, Kentucky, who was hauling clay tile for a firm in Tennessee. The front part of his truck was damaged, but none of the contents were spilled or broken.

Two trucks collided on U. S. 25 near Renfro Valley last Sunday. The milk truck belonged to Ernest Godbey and the other which was loaded with furniture, to Buford Martin of Mechanismburg, Ohio. No one was injured. The cause of the accident was not known.

6 Scholarships given From Union College

Six scholarships worth a total of \$900 Union College are available to this year's high school graduates in Rockcastle County, it was announced today.

In each high school in the county, the college is offering two scholarships. One is an honor scholarship available to either the first or second place winner of each class. It is worth \$200. The winner in his freshman year at Union College. The other is a special scholarship, for which any worthy and deserving student may apply. Students must secure his principal's recommendation, and his scholastic average must be received before July 1.

Students may secure application blanks for both scholarships by writing to the Director of Public Relations at Union College, Barboursville, Ky. Union is a liberal arts college, preparing students for most of the professions. In addition, it has education and business departments.

IN MEMORIAM

Of Robert Thomas Morgan who was taken away so quickly April 8th, 1952. What would I give to clasp his hand? His happy face to see. To hear his voice and see his smile; That meant so much to me. Sadly missed by his mom.

J. P. Smith, USN, Promoted to Boilerman

Recently advanced in rate to boilerman, third class, USN, was J. P. Smith, son of Mr. and Mrs. J. O. Smith of Burr, Ky. Smith's ship, the destroyer escort USS Douglas A. Munro, has been serving in Korean waters since Nov., 1951, and has seen action in Wonsan on the Korean East Coast and in the Chinnampo area on the West coast. Smith has been on board the Munro since the ship was commissioned in Feb., 1951.

Representative To Be In Mt. Vernon

A representative of the Lexington, Kentucky office of the Social Security Administration will be at the Courthouse, Mt. Vernon on Thursday, June 5, at about 10 o'clock for the purpose of furnishing information and assisting persons in filing claims under the Old-Age and Survivors Insurance benefit provisions of the Social Security Act. All workers who are at least 65 years of age and residing in or near Mt. Vernon employed in an occupation covered by the Social Security Act, as well as the nearest relatives to visit that representatives of deceased who have been so employed are invited to visit that representative.

Frank and Harvey Pensol are spending their furloughs with their mother Mrs. Sadie Pensol

CONTROL OF WEEDS MAIN PURPOSE OF CULTIVATING CROPS

The control of weeds is the main reason for cultivating tobacco, corn and other row crops according to "Productive Soil," Circular 468 of the University of Kentucky College of Agriculture and Home Economics.

Cultivation should be shallow so as to disturb the roots of the plants as little as possible, it is stated. The surface should be left fairly level. "Ridging corn, tobacco and other crops at the last cultivation, is, in general, not desirable and may even decrease yields in dry years by reducing the amount of water and nutrients the crop can take up," the circular says.

In wet years, on level, poorly drained land, ridging may be helpful in promoting drainage and aeration immediately around the plants. Sometimes, also, it is done to cover weeds in the row. As a general rule, if a good seedbed has been prepared, cultivation should be that which most effectively controls weeds without stirring the soil deep, particularly after the crop has reached some size. Cultivation of tobacco spreads disease and for this reason no more should be done than necessary. On highly productive soil, the vigorous growth of the crop holds down growth of weeds and makes less cultivation necessary.

TODD DAIRYMEN REPORT PROFIT

Three Todd County farmers who cooperated with UK County agent Stuart Brabant in a study of milk production, reported an average gross income of \$333 a cow in a year which ended March 1.

The feed cost a cow, including grain, hay and pasture, was \$164, which left a net profit above feed cost of \$149. The cows produced an average of 2,000 pounds of milk.

Fertilizer Boosts Crops Profits And Rebuilds Farm Soils

Using fertilizer is simply good dollars and cents business these days, says Dr. William A. Albrecht, chairman of the soils department of the University of Missouri.

Take the corn crop, for instance. Dr. Albrecht reports that it requires nearly 40 bushels of corn per acre to meet production costs, exclusive of fertilizer.

When it is considered that average corn yields are less than 50 bushels per acre in most Midwestern states, the use of fertilizer can provide the margin of profit the farmer needs to make money.

Dr. Albrecht said that more and more farmers are realizing the need for management methods that build the soil permanently rather than merely stimulate crop production. In Missouri alone, farmers are using four times as much mixed fertilizers containing nitrogen, phosphate and potash as in 1945.

Emphasizing the need for long range soil building, Dr. Albrecht pointed out that fertilizers are only starters and crop stimulators when added with the seeds near the soil's surface.

Sustaining soil fertility is provided when fertilizers are plowed under in great amounts or applied at greater depths, he said. Such a system stimulates the soil rather than just fertilize one crop.

5,063 pounds of milk, which sold for an average of \$266. The top herd was owned by Charles Power. His 22 cows, most of which were artificially sired, averaged 6,340 pounds of milk. His gross income was \$388-a cow and profit above feed cost, \$199. Sale of milk averaged \$343 a cow.

FARMERS WANT BETTER HOUSING FOR ANIMALS

Many farmers in Hickman county are interested in the erection of cheaper and more plentiful housing for livestock and poultry. Warren Thompson, University of Kentucky county agent, notes that the pole type barn, with gable roof and storage facilities for bedding and feed, is popular. For example: W. H. Byassee has completed a pole barn well located near a grade-A barn, making for easier handling of cattle. Hazel O'Neal is ready to begin construction of a pole barn, W. L. Spicer is planning a pole barn to be used primarily for machine storage at this time, but also to be converted to a beef cattle barn, and C. C. Hancock and Son are planning a pole barn for their herd of registered Angus cattle.

With the trend toward commercial laying flocks, 50 by 50-foot or larger gable-type poultry houses are being built. POULTRY MEAT AND EGGS GOOD FOR YOUR HEALTH AS WELL AS APPETITE. Although most people eat poultry meat and eggs because they like them, greater consumption of these foods is justified by their nutritive value. Don W. Lyon, general manager Poultry & Egg National Board declared today. Mr. Lyon made this statement in a message directed to the millions of families who will include chicken, turkey, and eggs in picnic meals this summer. Poultry meat is an excellent source of high quality protein, the nutrient which furnishes the building blocks for all body tissues, he said. In addition, poultry meat contains a great variety of important minerals and vitamins. There is phosphorus, needed for normal bone and tooth structure; niacin, an essential food element and a preventive of pellagra; iron, needed for good blood; thiamin, another essential nutrient and the first of the vitamins to be discovered; riboflavin, essential to tissue

respiration; and a great assortment of other vitamins and minerals which play both great and small roles in the maintenance of bovine health.

The following points were made in regard to eggs: Eggs are one of the protective foods. Eggs, like poultry meat, furnish proteins of particularly high quality and biological completeness and contain all of the amino acids necessary to growth, vigor, and body maintenance. Nutrition studies have demonstrated the need for the daily use of complete proteins such as eggs supply.

Recent scientific research has revealed the fact that eggs are an important source of vitamin B-12. Vitamin B-12 is one of the recently discovered members of the vitamin B complex group and has been shown to be valuable in the treatment of pernicious anemia. A serving of only two eggs supplies about 22 percent of the average adult's needs for the average adult. Two eggs, served in any of many appetizing ways supply up to 18 and 26 percent, respectively, of the average daily needs for phosphorus and iron. Eggs are used and recommended from earliest infancy onward. They are rich with the nourishing essentials that people of all ages need.

county agent with the University of Kentucky, says the cow averaged 100 pounds of milk for the past 90 days.

CONWAY

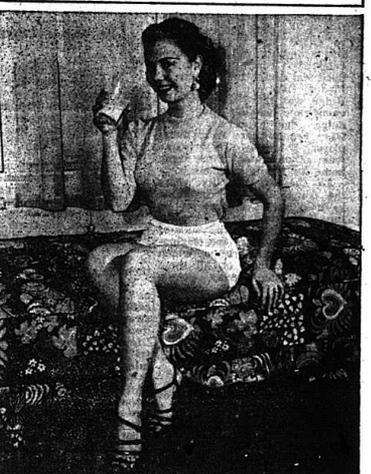

We are sorry to hear of the death of our good friend and neighbor, Mrs. Liza Thomas of Boone, who passed away Wednesday, May 27th. Mr. and Mrs. Robert Harbough, Lima O.; visited her parents, Mr. and Mrs. Millard Poynter and family and her grandparents, Mr. and Mrs. Tom Moore and family. Mr. and Mrs. Albert Miracle

are making their home in Berea. Mrs. Henry Bowman has been on the sick list.

40 NEIGHBORS HELP IN RAISING BARN

With the help of about 40 neighbors and friends in an old-fashioned barn raising, Joe Ashbrook of Ballard county had a new barn about three-fourths completed in 1 day. The pole-type barn, 52x52 feet in size, was made of lumber cut on the farm. Total cost was less than \$1,000. A. K. Kelley,

A "TOAST" TO JUNE DAIRY MONTH

20th Century-Fox Star Mitzel-Gaynor raises a "toast" to June Dairy Month and the U. S. dairy industry as she drinks a glass of milk between "takes" in her Hollywood dressing room. Dairy Month, June 1-30, a star in its own right on the American scene, is being staged for the 16th consecutive year. Its purpose is to make to the nation's health and the stabilization of our economy. About 10 million Americans gain livelihood from the production, processing and distribution of foods such as ice cream, milk, butter, cheese, evaporated milk and dry milk. The dairy industry contributes at least 10 billion dollars to national commerce. Miss Gaynor will soon be seen in the motion picture comedy, "We're Not Married."

High Soil Fertility Needed for Bumper Wheat Yields Plump Kernels and Extra Protein

THE payoff on your wheat crop is in the grain in the bin after harvest, points out the Middle West Soil Improvement Committee.

To make a good crop, your soil has to supply plenty of plant nutrients. "If you expect to get lots of kernels per acre," says a statement by the committee, "your wheat has to have lots of heads. And many meshes per head.

"High yields usually mean high quality grain, with plump kernels and a better than average protein content."

When your soil is well supplied with a balanced stock of nitrogen, phosphate and potash, the wheat will develop a strong, thicker root system, says the committee. This enables the plants to forage through more soil for nutrients and water. It makes for more tillers per grain or seed, makes more heads per acre, gives heads that are longer and increases the number of kernels per head.

Kernels that have enough plant nutrients will be plumper and heavier and frequently will have higher amounts of protein that makes them better feed for livestock.

Farmers who produce top wheat yields report that adding a complete

Well fertilized wheat makes more heads per acre, more kernels and extra protein.

fertilizer at seeding time and then following with a nitrogen top dressing in the spring gives them extra bushels per acre.

SELLING AGENTS Winchester, Ky. A. T. ROSE, Agent 1191-W, Richmond

Picking wild strawberries alongside the highway near Berr. The two women are from Mt. Vernon.

Picking strawberries on the farm of C. E. Hasty near Quail. Mr. Hasty planted an acre of Tennessee Beauty berries last year in March and this was his first crop. He guessed that he will harvest about 100 crates this year which will sell for about \$7.50 per crate. The girl in the picture is Shirley Brown.

START YOUR HOME CANNING EARLY!

A wide variety of early vegetables and fruits can soon be on YOUR shelves in Ball Mason Jars ready for winter meals. Plan to start your home canning when the first fruits and vegetables come to market. When they are best for table use, they are best for home canning. That's an easy rule to follow.

HAY PRODUCTION BOOSTED 5 TIMES

W. W. Durham of Marion county increased hay production on his farm by almost six times over a period of three years. In 1949 he put up 741 bales; in 1950, 1,330 bales, and 1951, 4,116 bales plus a large crop of fescue and orchard grass seed.

REMOVE BUTTONS BEFORE WASHING

Many of the new cotton dresses have jewel-like buttons as a decoration or for fastening. Miss Ruth Guenther, clothing instructor at the University of Kentucky, warns that such buttons should be removed before the garments are washed.

Top Dressing Speeds Alfalfa's Comeback

ALFALFA fields will make quick comeback this summer if you top dress them with phosphate and potash fertilizer after the first cutting of hay, reports the Middle West Soil Improvement Committee. The committee lists these benefits from top dressing alfalfa:

ORLANDO - Renner and son, Miss Vistal and Juanita Cameron, Mr. and Mrs. Arthur Bryant of Lockland. Mr. Dan Cameron Jr., has purchased a new GMC truck. Mrs. Joe Cameron is very ill at this writing.

OLD FASHIONED PRESERVES

A dish of your own home-made strawberry preserves is the surest way in the world to bring a gleam into the eyes of the lucky people who sit down to your table. The story is wonderful from beginning to end—the making of the preserves with the aroma of the bubbling strup filling the kitchen; the sight of the rich red fruit and strup in Ball Jars on your shelves; and, finally, the serving of the preserves, perhaps with hot, flaky biscuits.

Fish and Game Laws Revised

Frankfort, Ky., May 27—The limit of black bass which a fisherman may take from Cumberland Lake has been raised to 15 per day and the size limit has been eliminated altogether for the months of June, July and August. This action was taken today by the Game and Fish Commission, in session in Frankfort, and Earl Wallace, director of the Division of Game and Fish. It is pointed out that these new regulations apply only to Cumberland Lake and the creel limit of 10 per day and a minimum of 10 inches in length, still apply to all other waters of the state. At Cumberland Lake the 15 limit shall be the first 15 taken.

Removes the law making mandatory the confiscation of unplugged guns

Repeals county hunting and fishing licenses and law which permits 10 day non-resident fishing license for \$2, and repeals former law which permitted three-day licenses for \$1.

Repeals wholesale fish dealer license
